QUICK GUIDE

version 001/09

LOGGING IN

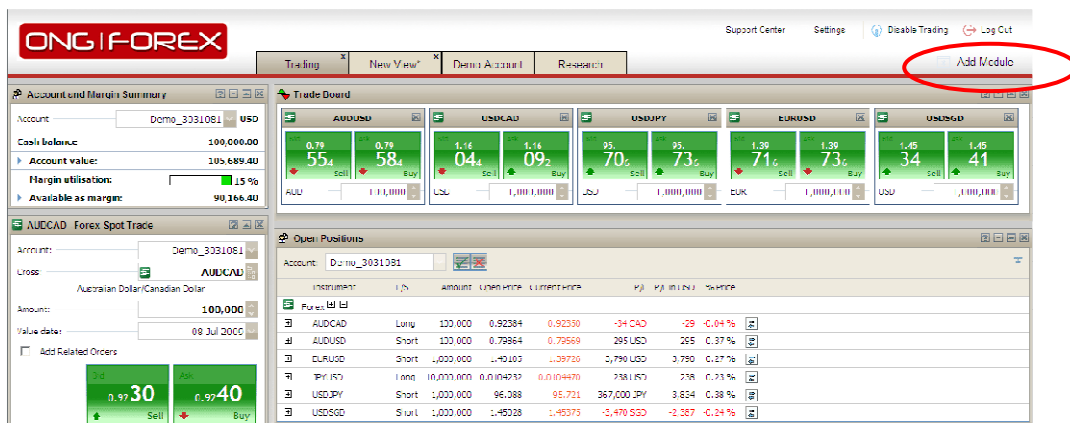

1. DEMO System: <https://web.ongforex.com/demo>
LIVE System: <https://web.ongforex.com>
2. Enter existing client ID and password.
3. Click OK.

WORKSPACE

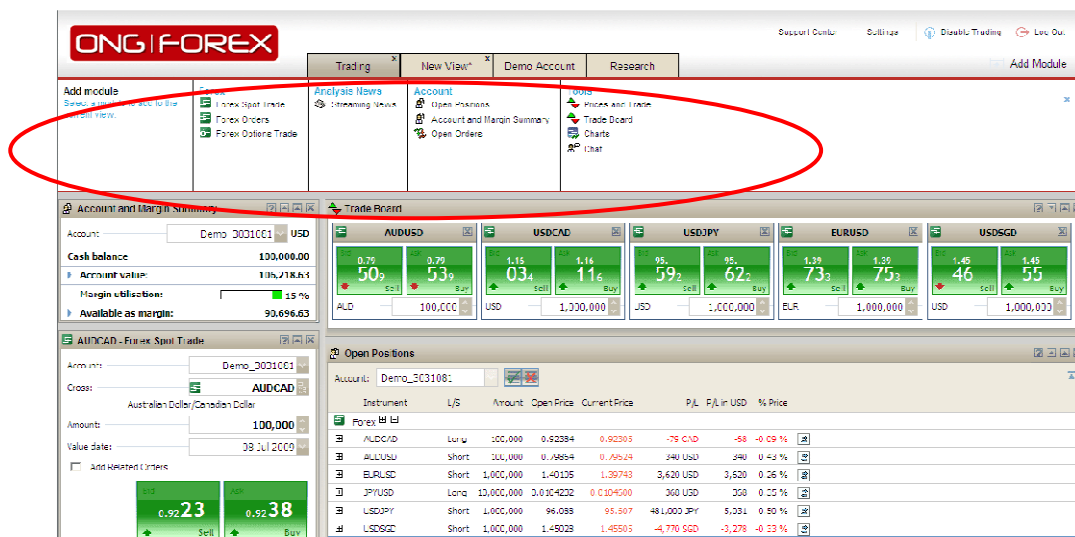

You get a default workspace, but you can customize the Trading view.

Add Module

1. Click Add Module.

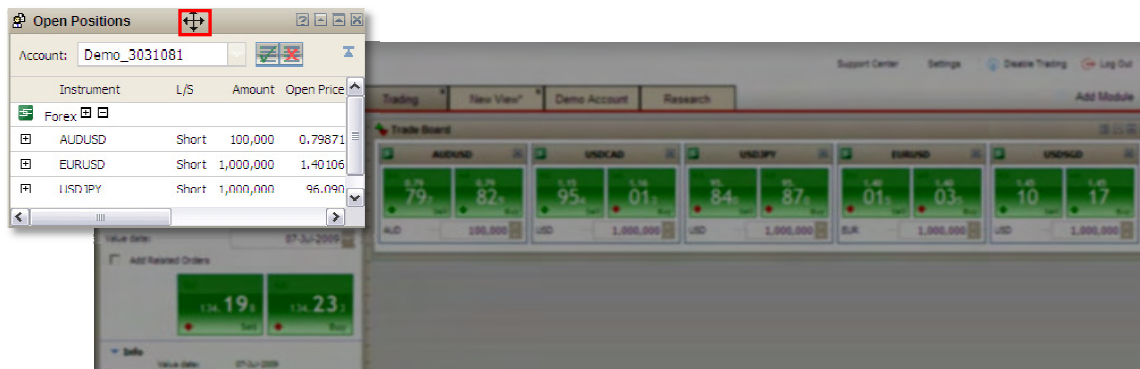

2. Click on the module you want to add.

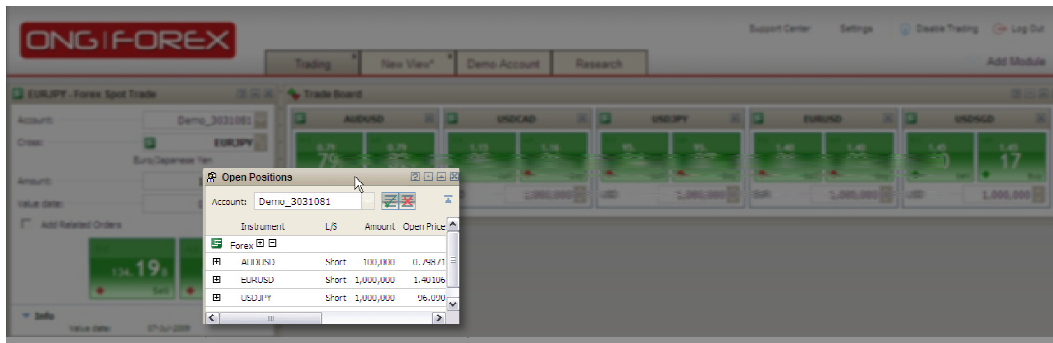

The module is added in the left hand corner of the workspace. You can move the module and dock it where you prefer to have it located.

Move Module

1. Place the mouse pointer in the header of the module.

2. Drag the module to the preferred location. As you drag the module, a box indicating where the module will dock appears.

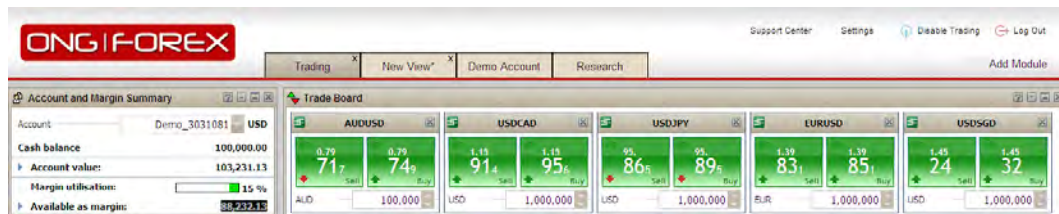

FIND INSTRUMENT

Forex Spot Trade

Select the currency cross you want to trade from the drop-down menu.

Forex Board& Prices and Trade

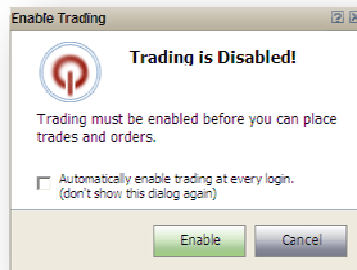

Type instrument symbol in “New:” or click to add several instruments.

How to add several instruments:

1. Click Add icon . The Add instrument list appears.
2. Select the required instrument(s). You can add a selection of instruments by holding the Ctrl key down and at the same time clicking on the instruments you want to add or you can select a range of instruments by holding down Shift key, clicking on the first instrument in the range and then on the last in the range.
3. Click OK.

ENABLE TRADING

If not enabled, you will be prompted to enable trading when you try to trade.

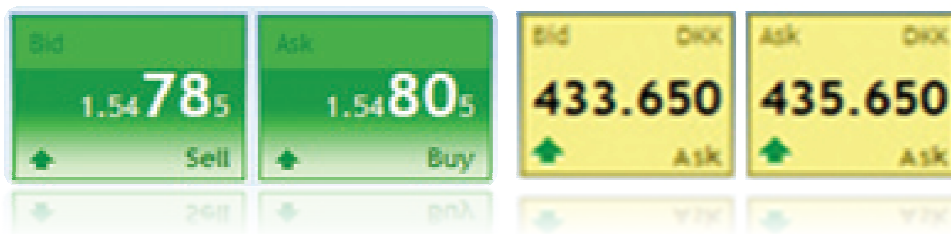

TRADE

Forex Spot Trade

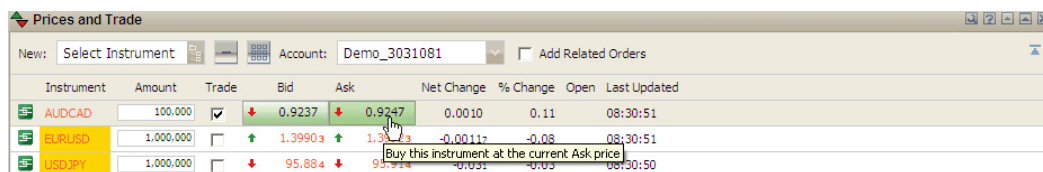

Green price fields indicate that the price is tradable. Live tradable prices are available for trade amounts below the auto-execution threshold.

Yellow price fields indicate that the price shown is indicative. Click Live Price to receive a price.

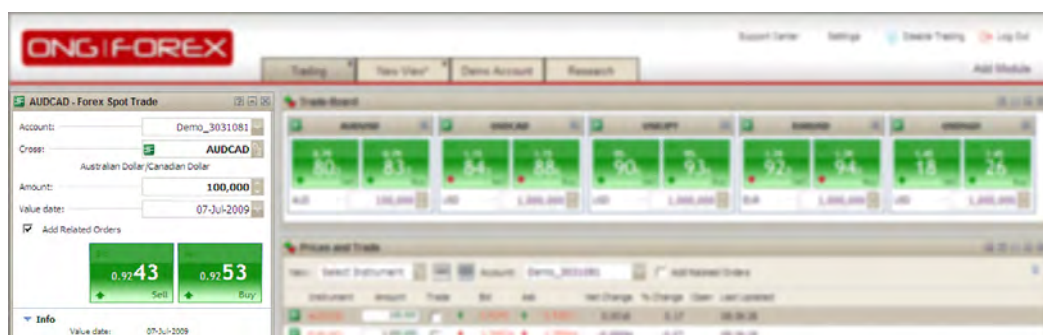

Prices and Trade

1. Enter the Amount you want to trade.
2. Tick the box in the Trade column. The Bid and Ask prices change to trade buttons.
3. To buy click on the button in the Ask column or click on the button in the Bid column to sell.

Forex Board

1. Enter the Amount in the Amount field.
2. Click Buy or Sell.

ORDERS

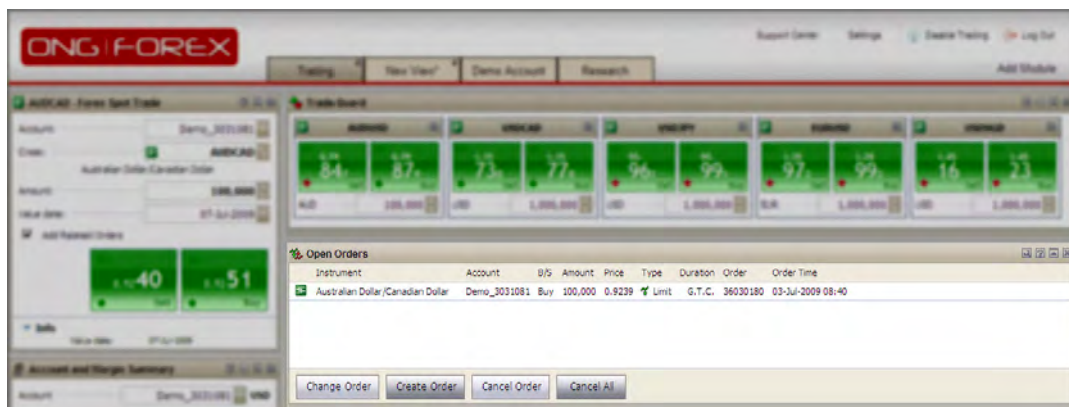

Add related orders to position

1. Tick Add Related Orders to place related order(s) after a trade.
2. Click Buy or Sell. The Add Related Orders dialogue will appear.

Open Orders

Create or manage your orders in the Open Orders module.

OPEN POSITIONS

View and manage your open positions in Open Positions module.

The screenshot displays the Oling Forex trading platform interface. The top navigation bar includes 'Trading', 'New Year', 'Demo Account', and 'News'. The main area is divided into several sections: 'Trade Board' with multiple green candlestick charts, 'Open Orders' with a table of pending orders, and 'Open Positions' at the bottom. The 'Open Positions' section is expanded, showing a table of active trades for the account 'Demo_3031091'.

Instrument	L/S	Amount	Open Price	Current Price	P/L	P/L in USD	% Price
Forex							
AUDUSD	Short	100,000	0.79071	0.79059	12 USD	12	0.02 %
EURUSD	Short	1,000,000	1.40106	1.39946	1,600 USD	1,600	0.11 %
JPYUSD	Long	10,000,000	0.010423	0.010419	-40 USD	-40	-0.04 %
USDJPY	Short	1,000,000	96.090	95.975	115,000 JPY	1,198	0.12 %
USDGBP	Short	1,000,000	1.4902	1.45195	-1,690 USD	-1,136	-0.11 %

Close a position

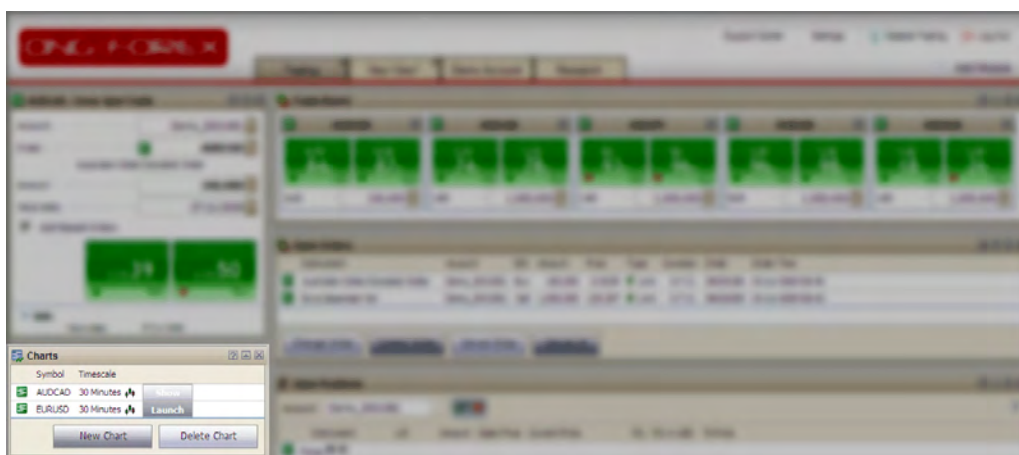

Place a related limit order

Place a related stop order

OPEN POSITIONS

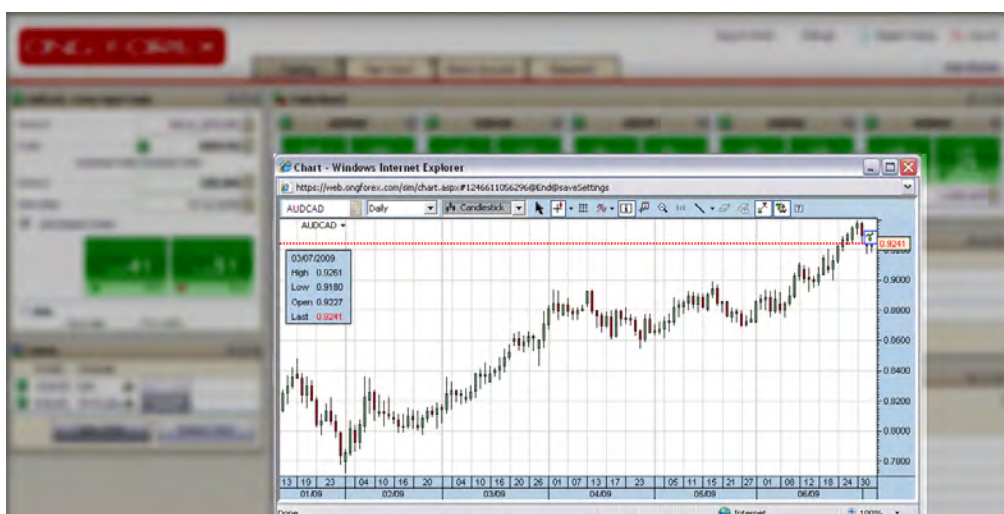

New Chart

1. Click New Chart.
2. Select the instrument, time scale and chart type.
3. Close the chart. It will now appear in the Charts and you can easily launch the chart again.

Launch chart

Click Launch for the chart you want to launch. The chart window appears. If the chart is already launched, but not visible, click Show.

Location

The chart launches in a separate window and can't be docked. It is best located on a second monitor or beneath WebTrader if you only use one monitor. To view a chart full screen, click on the chart and press F11. Press F11 again to restore to original size.
